

Publications

- [1] D. Basak, A. Dong, K Saettone, and A. Zaharescu. Pollock’s conjectures on icosahedral and dodecahedral numbers. *International Mathematics Research Notices*, 2025, 2025.
- [2] R. Bhat, A. Dong, and A. Zaharescu. Ternary goldbach for modular sets of Piatetski-Shapiro primes. *Bull. Math. Soc. Sci. Math. Roumanie*, 68(3):253–280, 2025.
- [3] A. Dong, C. Edsey, S. Iwai, and A. Zaharescu. Self-intersection points of billiard trajectories in a square with small pockets. *In preparation*, 2026.
- [4] A. Dong, X. Li, and V. A. Nguyen. On a conjecture about sums of Farey fractions. *Submitted, preprint arXiv:2604.02475*, 2026.
- [5] A. Dong, H. X. Nguyen, V. A. Nguyen, and A. Zaharescu. A generalization of Mundici’s conjecture. *Submitted, preprint arXiv:2606.12907*, 2026.
- [6] A. Dong, T. Nguyen, and A. Zaharescu. On the order of four-dimensional regular polytope numbers. *Results in Mathematics*, 80(182), 2025.
- [7] A. Dong, V. A. Nguyen, and A. Zaharescu. Admissible pairs: a variation to Pollock conjectures. *Submitted, preprint arXiv:2608.03309*, 2025.
- [8] A. Dong, V. A. Nguyen, and A. Zaharescu. Erdos–Moser equation in arithmetic progressions. *Submitted, preprint arXiv: 2608.03375*, 2025.
- [9] A. Dong, N. Robles, A. Zaharescu, and D. Zeindler. Exponential sums twisted by general arithmetic functions. *Submitted, preprint arXiv: 2412.20101*, 2024.
- [10] A. Dong, N. Robles, A. Zaharescu, and D. Zeindler. Strange and pseudo-differentiable functions with applications to prime partitions. *Research in Number Theory*, 11(52), 2025.
- [11] A. Dong, N. Robles, and D. Zeindler. Bilinear forms with Kloosterman fractions and applications. *In preparation*, 2026.
- [12] A. Dong, K. Saettone, K. Song, and A. Zaharescu. An equidistribution result for differences associated with square pyramidal numbers. *Submitted, preprint arXiv:2412.10097*, 2024.
- [13] A. Dong, K. Saettone, K. Song, and A. Zaharescu. Cannonball polygons with multiplicities. *Hardy-Ramanujan Journal*, 48, 2025.

- [14] A. Dong, K. Saettone, K. Song, and A. Zaharescu. An equidistribution result for differences associated with square pyramidal numbers *II*. ***Aequationes mathematicae***, 100(64), 2026.
- [15] A. Dong, N. Wattanawanichkul, and A. Zaharescu. The $\theta = \infty$ conjecture and the riemann hypothesis for automorphic l -functions. *Submitted, preprint arXiv:2605.24363*, 2026.
- [16] A. Dong, N. Wattanawanichkul, and A. Zaharescu. Zeros of polynomials in derivatives of automorphic L -functions. ***Mathematika***, 33(1), 2026.
- [17] A. Dong and A. Zaharescu. Generalizations of Pollock’s centered nonagonal numbers conjecture. ***The Ramanujan Journal***, 68(82), 2025.
